Here at Kingshurst Multimedia we are passionate about creating software that supports and enhances the ever changing world of education. As educators ourselves we have a unique insight into the needs and requirements of today's modern classroom, allowing us to work directly with teaching staff and students to create truly first class products and services.

By Education. For Education.

Based within the CTC Kingshurst Academy the primary function of Kingshurst Multimedia is to provide support for teaching and learning through key stages 3, 4 and 5.

All our products are the ideas of experienced classroom teachers; they take the primary role in making sure anything we develop works in the classroom and meets the learning need or gap they identified.

It's all about 'keeping it real' to provide solutions that work effectively and consistently, that you can rely on in your classroom.

We are currently in the process of testing and adding features to the new site. In the meantime we apologise for any inconvenience this may cause.

Thanks!

By Education. For Education.
